

**Attention Officers and Buyers,**

As you may know, the Centers for Disease Control and Prevention (CDC) has identified human cases of swine influenza A (H1N1) virus infection in the United States. Human cases of swine influenza A (H1N1) virus infection have also been identified internationally. The following are some CDC tips for limiting your risk of catching the swine flu virus:

- ◆ Cover your nose and mouth with a tissue when you cough or sneeze. Throw the tissue in the trash after you use it.
- ◆ Wash your hands often with soap and water, especially after you cough or sneeze. Alcohol-based hand cleaners are also effective.
- ◆ Avoid touching your eyes, nose, or mouth. Germs spread that way.
- ◆ If you get sick, stay home from work or school and limit contact with others to keep from infecting them.

The ICS crew wants to make you aware that we have various products available that support some of the CDC recommendations on how to prevent the spread of the swine flu virus. Give us a call for an additional information you might need. **1-800-524-5427 toll-free**
